Art Unit: 1732

1.It appears that a change in the spelling of "condoles" is in order since a large majority of practitioners appear to use "condyles".

2.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3.Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wu (6,709,617) in view of Hellberg (6,440,345) as set forth in the previous Office action.

Based on the positioning of the moldable means illustrated in the prior art relied upon, it is submitted that the moldable means would inherently capture a shape formed by femoral condoles (condyles) within the limb as they naturally move into a proximal and anterior position, moving forward and proximal at a substantially positive flexion position.

4.Claims 1-17 are allowed.

5.Applicant's arguments filed February 17, 2006 have been fully considered but they are not persuasive. Applicant argues, with regard to claim 18, that a person of skill in the art will understand that the positions shown in the prior art references are insufficient for capturing the shape required by the limitations of claim 18 because the prior art positioning is not substantially positively flexed. The examiner disagrees because the Hellberg reference at column 4, lines 1-7 explicitly states that the knee should be flexed and identifies an advantage realized by flexing the knee.

6.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7.Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.
